6000E&6000M

Current Vector Inverter

» Company Profile

Shenzhen ALPHA Electric Co.,Ltd was established in 2000, and owns more than 30 subsidiaries and 50 after-sale service centers across China. Our headquarter is located in Longhua district of Shenzhen City, and has another 2 manufacturing bases are located in Zhejiang Province and Jiangxi Province. The company employs more than 500 people, of which about 60 percent are technology staff.

Our main business is in the design, development, and sales of industrial automation, power assembly of new energy automobile, and intelligent elevator control system. Meanwhile, as a High-Tech enterprise, we put a lot of focus in R&D expenditures. We have several comprehensive laboratories, we have introduced the advanced technology from both domestic and abroad, we also allied with a number of scientific research institutions and universities.

Through years of efforts, our professional sales and after-sale service teams help Alpha not only gain the customers recognition by reliable products, but also gain the customers trust by premium services. In the future, we will continue to serve our partners with professional spirit and excellent services based on industrial automation, new energy vehicle, and elevator control fields, achieve win-win collaboration.

» Product Introduction

6000E/M is a high-performance open loop current vector frequency inverter. It adopts 32-Bit DSP, high integration, compact design, perfect protection, high reliability. The controlling software integrates advanced current vector controlling technology and magnetic flux vector controlling technology with strong overload ability which ensures the quick response, stability in low frequency running, high torque output in low frequency. It can meet with a wide application demands with leading technology in global market.

» Features

| | | |
|----------------------|--|---|
| Compact Structure | Optimized structure design, advanced technical platform | |
| | Improved brake circuit | |
| | Optional built-in brake unit for 18.5KW~93KW | |
| Superior Performance | High accuracy of stable speed, wide speed scope | |
| | High output under vector control | |
| | High torque under low speed, small torque fluctuation | |
| | Optimized VF algorithm | |
| | High accuracy of motor parameter setting | |
| | AVR Function guaranteed high torque output under low voltage | |
| High Reliability | High heat reliability | Independent ventilation design |
| | Temperature increase test | Accordance with the wide voltage input scope under international standard |
| | Auto-spraying technology | long life-time design |
| | Improved EMC design | Compliance with CE certification |
| Easy to use | Overexcitation Function | Rs485 Communication port and MODBUS communication agreement |
| | Instant shut down without stop machine | Application in wind generator and pump |
| | Improved machine protection | VF fully separation and semi-separation |
| | Keyboard extension | Diverse terminal function, ease to use |

» Application

CNC Machinery, Chemical Fiber, Plastic Machinery, Textile Machinery, Food Machinery, Ceramic Machinery, Centrifugal Machinery, Wood Craft Machinery, Printing Machinery, Package Machinery, Wind Generator, Pump, etc.

» Control Loop Terminal Function

» Product Information

• Product naming rules

ALPHA6000E - **3** **R75** **G** **B**

(1) Serial No ALPHA6000E ALPHA6000M

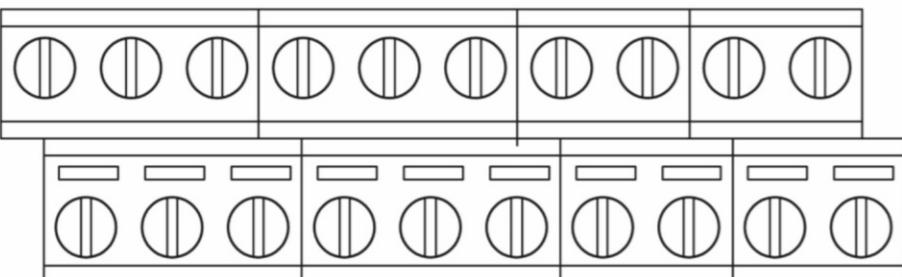

(2) Rated voltage S2: Single phase 220V 3: Three phase 280V;

(3) Rated motor power R75:0.75KW 7R5:75KW 075:75KW

(4) Suitable load G: General type P:Square torque type ;

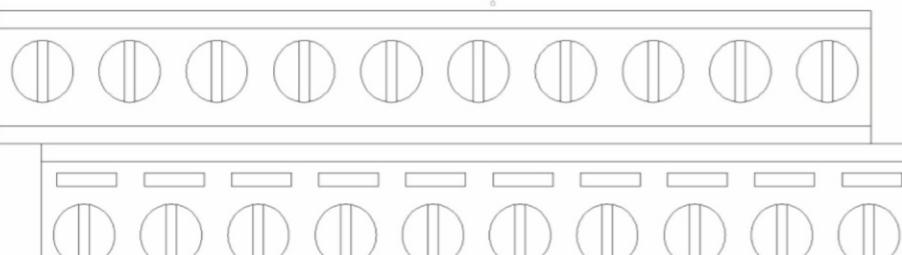

(5) Additional remark S: With braking unit

• Control Circuit Terminal

| | | | | | | | | | |
|-----|-----|----------|-----|-----|-----|----|----|----|----|
| 10V | A01 | GND | X1 | X2 | X3 | X4 | X5 | TA | TC |
| AI1 | AI2 | 485+485- | COM | PLC | 24V | DO | TB | | |

Control circuit terminal configuration of S2R4GB~S2R75GB

| | | | | | | | | | |
|-----|-----|-----|----------|-----|-----|----|----|----|----|
| AI1 | AI2 | 10V | X1 | X2 | X3 | X4 | X5 | X6 | TB |
| PE | AO | GND | 485+485- | COM | 24V | DO | TA | TC | |

Control circuit configuration for power
S21R5GB, S22R2GB, 3R75GB/31R5PB or above.

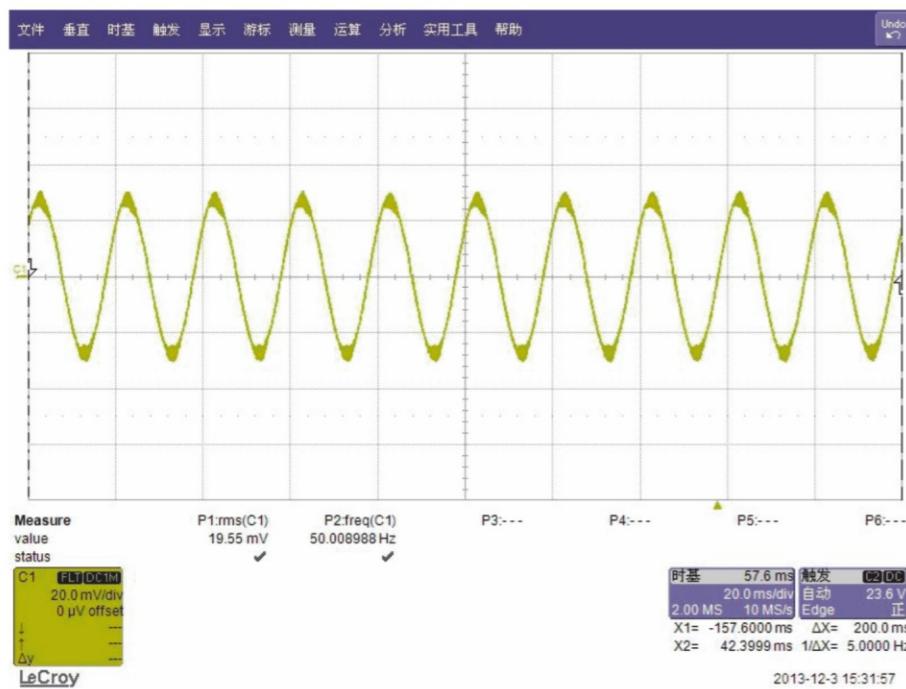

| Type | Terminal No | Name | Terminal Function | Specification |
|---------------------------------|-------------|-----------------------------------|--|---|
| Analog Input | A11 | Analog input 1 | Receive voltage/current input, Voltage/current is chosen by SW2, Default input voltage, range setting check instruction book P4.00~P4.05. | A11 Input voltage range 0~10V (Input impedance:30kΩ), A11 Input current range 0~20mA (Input impedance:250Ω) |
| | A12 | Analog input 2 | Receive voltage input, range setting check instruction book P4.06~P4.09. | A12 Input voltage range 0~10V (Input impedance:30kΩ) |
| Analog Output | AO | Analog output | Provide analog voltage/current output, voltage/current chosen by SW3 switch. Default input voltage indicates 14 amounts. | Current input range: 0~20 mA/4~20 mA Voltage input range: 0~10V/2~10V |
| Communication | 485+ | Rs485 Communication interface | 485 differential signal plus end | Standard RS-485 communication port, not isolated with GND, twisted pair or barrier wire only. |
| | 485- | | 485 differential signal minus end | |
| Multi-Functional Input Terminal | X1 | Multi-functional input terminal 1 | Defined to be multi-functional switch of input terminal | Optical-Coupler isolation input, Input impedance r=3.9kΩ, Maximum input frequency 400Hz, Input Voltage scope: 0~30V. |
| | X2 | Multi-functional input terminal 2 | | |
| | X3 | Multi-functional input terminal 3 | | |
| | X4 | Multi-functional input terminal 4 | Defined to be multi-functional switch of input terminal except defined to be high speed pulse input port, defined to be multi-functional switch of input terminal only under S2R4GB, S2R75GB | Optical-Coupler isolation input, Input impedance R=3.9kΩ, Maximum input frequency: 400 Hz/50KHz, Input voltage : 0~30v, |
| | X5 | Multi-functional input terminal 5 | Defined to be multi-functional switch of input terminal except defined to be high speed pulse input port | Optical-Coupler isolated input, Input impedance R=3.9kΩ, Maximum input frequency: 50KHz, Input voltage Scope: 0~30V Reference: COM. |
| | X6 | Multi-functional input terminal 6 | | |
| Multi-Function Output | DO | Output terminal of open electrode | Defined to be multi-functional pulse signal output terminal as well as the switch of output terminal | Optical-Coupler isolated open electrode output. Voltage scope:0~26V, Maximum output current: 50mA, Output frequency scope: 0~50KHz |
| Electric Relay Output | TA | Electric relay output | Defined to be multi-functional electric relay output terminal | TA-TB: Close. TA-TC: Open. Contact Capacity: 250VAC/2A (COSφ=1), 250VAC/1A (COSφ=0.4), 30VDC/1A |
| | TB | | | |
| | TC | | | |
| Power | 10V | +10V Power | Supply +10V power (Reference: GND) | Maximum output current 20mA Maximum open circuit voltage reaches 12V |
| | 24V | +24V Power | Supply +24V power (Reference COM) | Maximum output current 100mA |
| | GND | +10V Power | Analog signal and +10V power reference | Internal isolated with COM, +10V, A11, AO1 signal public terminal |
| | COM | +24V Power public terminal | Coordinate with other terminals for using | Isolated with GND |
| | PE | Isolated touching ground | Use for the ground connection of isolation layer of terminal wire, Simulate signal wire,485 communication wire, This terminal can be connected with the isolation layer of motor cable. | Internally connect with the PE of main circuit terminal |

» Features Instruction:

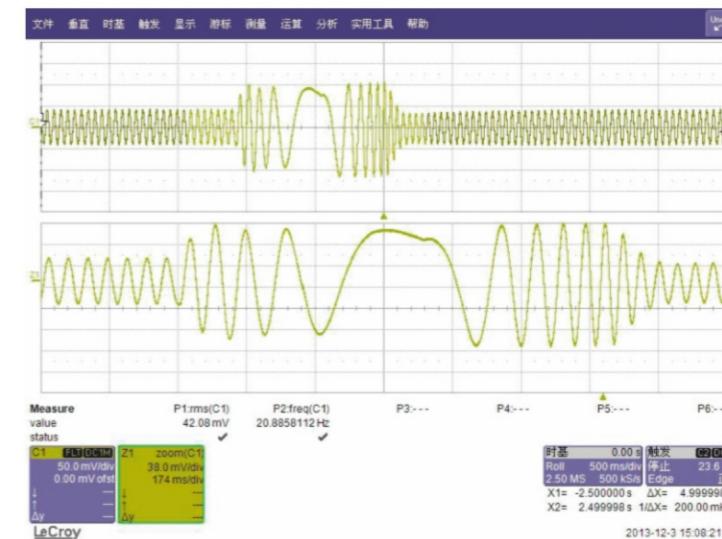

- Defined to be multi-functional switch of input terminal as well as high speed pulse input port, flexible combination between different input terminal.
- Rated input voltage: 380V-440V, 380V±20% fluctuation is allowed.
- Precision of stable speed: ±0.2% under vector control, ±0.5% under V/F control
Speed adjustment: 1:200 under vector control, 1:100 under V/F control.
- Dynamic torque repose time less than 20ms under vector control.
- Overload capacity of heavy load: 150% 60s, 180% 20s.
- Maximum output frequency is corresponding 4 times low intensity magnetic under vector control.

6000E integrated open loop vector control algorithm, excellent voltage and current control, strong load capacity, which guaranteed the quick response, stable running &high toque in low frequency for inverter.

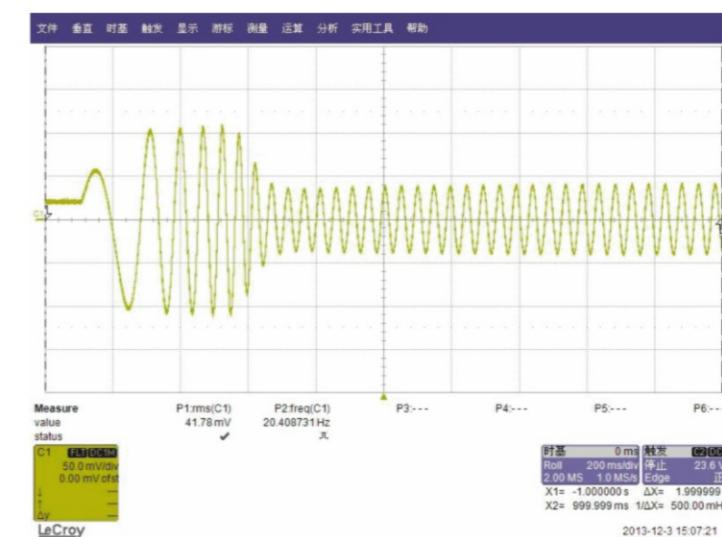

• 50Hz Current curve in stable running

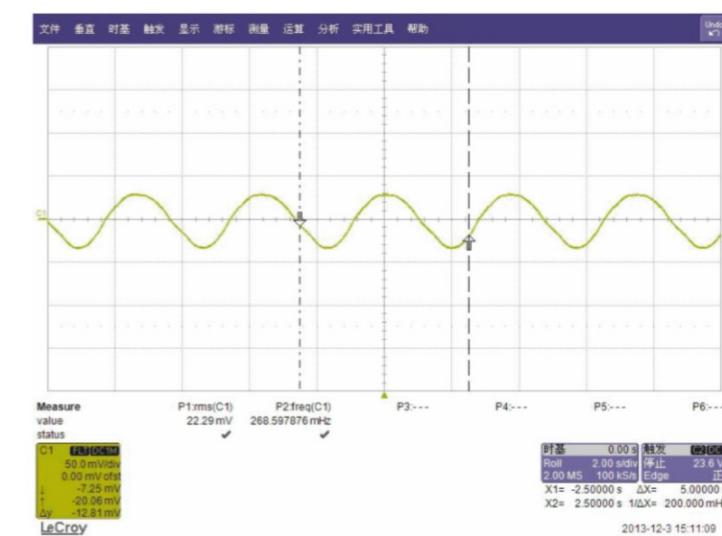

• Current wave form of positive and negative reverse

• 50Hz Accelerated current wave form

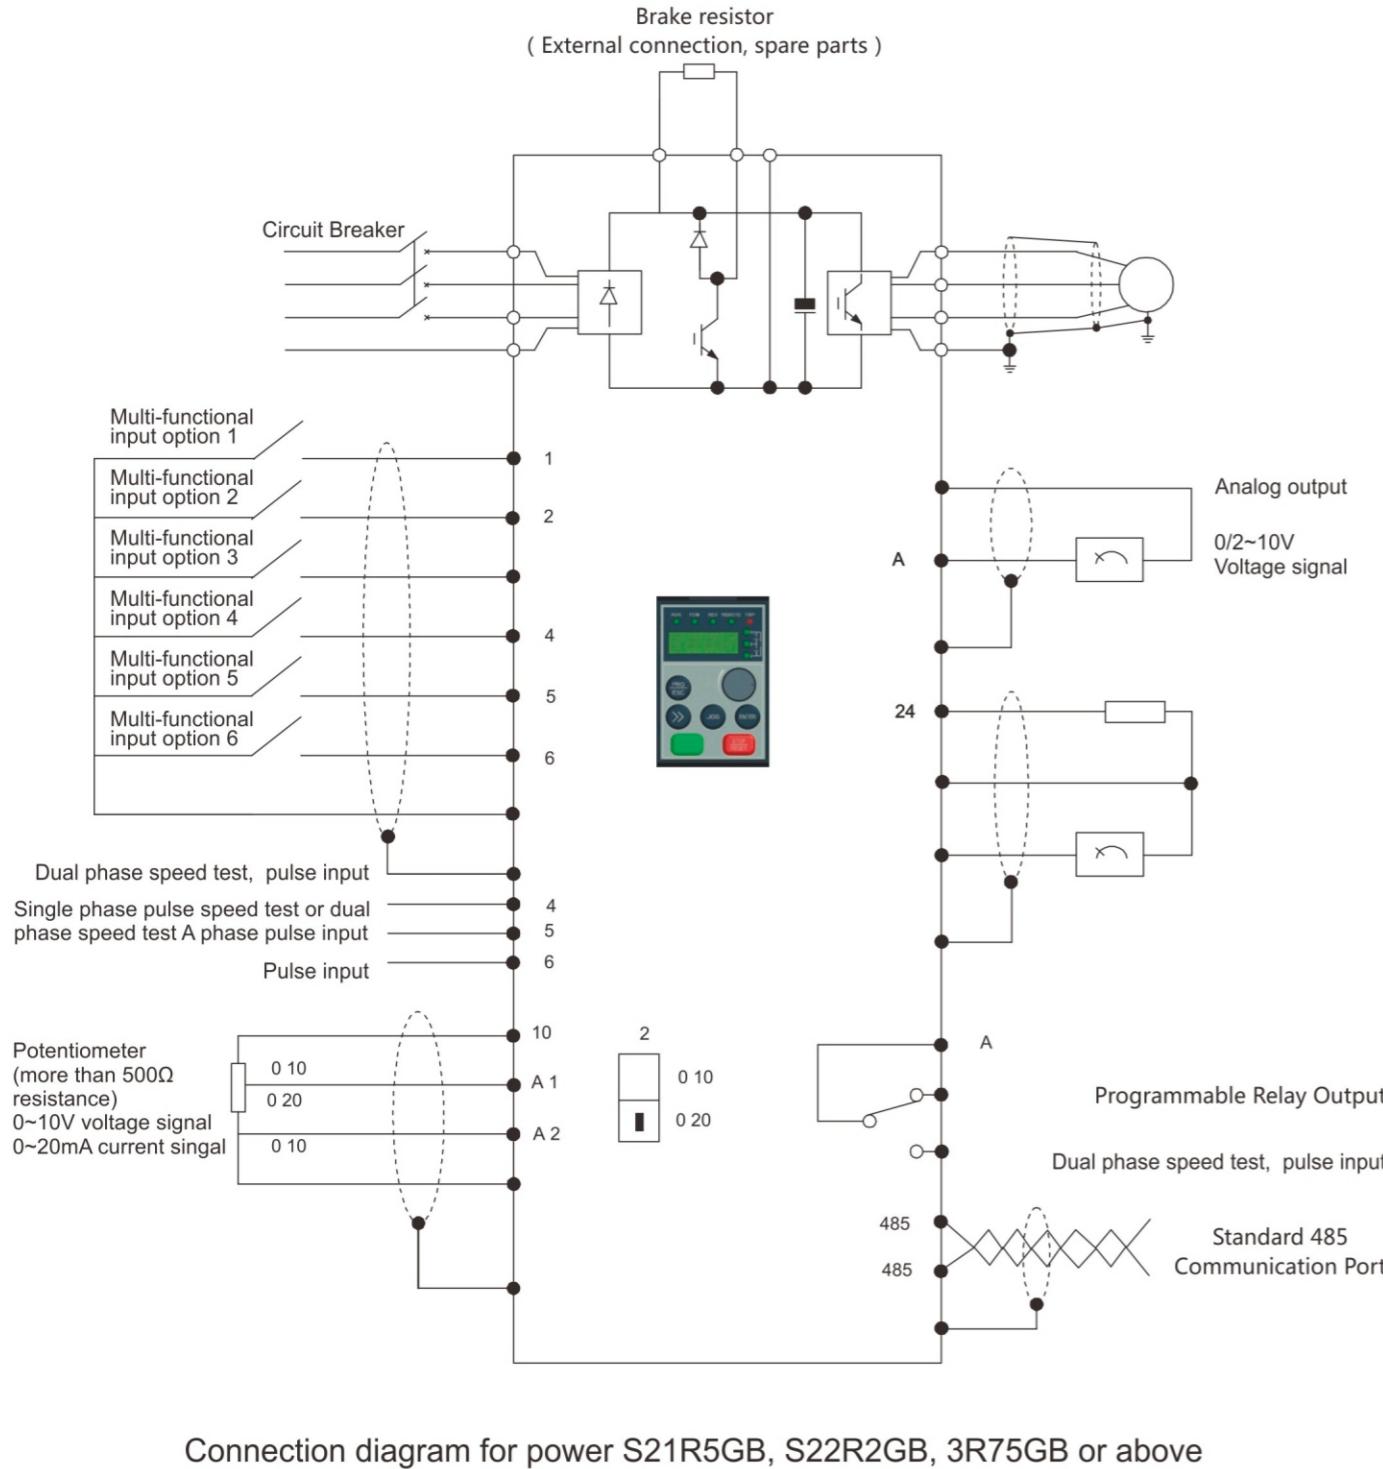

• Current wave form in 0.2Hz low frequency

» Technical Specification

» Connecting Diagram

| Subject | Specification |
|-------------------------------------|--|
| Rated input voltage, frequency | 3 Phase 380V~440V, 50/60Hz |
| Allowed input voltage working scope | 3 Phase 380V: 304V~456V, Voltage imbalance rate less than 3%, frequency less than +5% |
| Rated output voltage | 0~Rated input voltage |
| Maximum overload current | Type G, 150%/min, 180%/20 Sec. Type P, 120%/min, 150%/sec |
| Control mode | VF/Current vector control |
| Frequency controlling scope | Low frequency mode : 0.00~650.00Hz, High frequency mode: 0.0~1000Hz |
| Frequency accuracy | Digital command: ±0.01%(-10°C~+40°C) Analog command: ±0.01%(15°C~35°C) |
| Set frequency resolution | Digital command: 0.01Hz Analog command: 1/1000 maximum frequency |
| Output frequency resolution | 0.01 Hz |
| Frequency setting signal | 0~10V, 0~20mA |
| Accelerating time | 0.1~3600 Seconds |
| Braking torque | Additional braking torque up to 125% |
| Voltage / Frequency features | 4 optional fixed VF features, and random VF feature setting with RG VF control |
| Protection | Over-voltage, Under-voltage, Current Limit, Over-current, Overload, Electronic thermal relay , Over-heat, over-voltage with stall, short circuit load, touch ground, under-voltage protection, input default phase, output default phase, short circuit of touch ground or phases, motor overload protection, etc. |
| Ambient temperature | -10°C~40°C |
| Humidity | 5~95% RH |
| Storage | Storage -40°C~70°C |
| Working condition | Indoor without corrosive gas. |
| Installation | Altitude not higher than 1000 Meters without dust, corrosive gas and sunlight direct radiation |
| Vibration | Less than 5.9m/s ² (0.6g) |
| Protection level | IP20 |

» Specification and Parameter

| Model | Voltage | Input Current(A) | Output Current(A) | Motor Power(kw) |

» Spare Parts

| Serial No | Part Name | Mode No | Description | Picture |
|-----------|---------------------------|------------------------------------|--|---|
| 1 | Remote control box | KB6-LED08(big) KB6-LED11(small) | Optional keyboard, internal extra CPU, support parameter upload and download, improved anti-interference ability |  |
| 2 | Key board extension cable | KB6-C020A | Extend the cable of keyboard |  |
| 3 | Extension tray | 635MP03-A(big) 631MP08-A(small) | Fix the keyboard on the door when extension needed |  |

• Optional Functions

- Revolving speed tracking function

Machine that with power of 35R5GB/37R5PB or above could be equipped with this function, make remark when place order.

- High-power built-in braking unit

Optional built-in braking unit for machine that with power 3108G/3022P~3093G/3110P, Make remarks when placing order and add B after the model number

• Braking electric resistance and power chart
