JOYO-X11 Patrol System

SUMMARY

This product effectively guarantees the quality of patrol inspection through various technical means, and reduces the workload of patrol personnel. Through the tracking and management of the patrol inspection process, continuously accumulating the patrol inspection data, providing a scientific analysis method of the patrol inspection results, helping managers to accurately grasp the operation status of the equipment in time, improving the reliability of the operation of the equipment and the economy of maintenance.

ADVANTAGE

Intelligent inspection

Using the patrol APP, according to the content and technical standards of the patrol inspection of the equipment, automatic voice prompt, infrared temperature measurement, photography, recording, etc., can truly reflect the actual situation of the patrol inspection of the equipment.

Standard inspection

Inspect the equipment according to the pre-established technical standards for equipment patrol and inspection, and ensure the effectiveness and real-time of the equipment patrol and inspection work by appointing persons, appointing points, regularly, determining methods and defining standards.

Efficient management

Electronic patrol inspection of equipment, to truly achieve paperless patrol inspection.At the same time, it can share information with other existing information management systems of the enterprise, and effectively manage the patrol work of equipment.

Scientific Data Analysis

On the basis of ensuring that all the data are true and effective, the system provides a variety of data analysis methods, and can provide auxiliary analysis means to analyze the trend of the operation changes of the equipment, so as to predict the possible problems of the equipment.
